CloudBerry Drive mounts your Cloud-A account as a network or external drive. With CloudBerry Drive you can work with Cloud-A directly from the Windows Explorer interface, the same way as if it was your local drive.

## CloudBerry Drive for Cloud-A allows to:

### ✓ Access Cloud-A as a Windows Drive

CloudBerry Drive provides a user interface for Cloud-A accounts to move data across several accounts/buckets, local storage and FTP/SFTP server.

### ✓ Move files across local storage and Cloud-A

Drag and drop files to the cloud and back the same way as you do with local drives.

### ✓ Point 3rd party applications directly to Cloud-A

Use Cloud-A as a storage with other third party products and services installed on your workstation or server.
