

SIMPLIFIED CLOUD FOR TEAMS

Cloud-A is the leading provider of converged public cloud Infrastructure based in Canada. Our products automate & simplify the installation and management of virtual compute, storage and networking for any-scale environments having hundreds or thousands of servers supporting dynamically changing workloads.

Near-Infinite, Self Service, On Demand resources available 24/7

Open Platform, No Lock-In

No Term Contracts, No Minimums, Utility Billing

Easy To Use Dashboard, User APIs for Automation

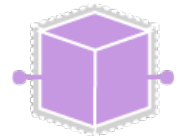

Compute

- Enterprise grade performance
- Rapid deployment
- 14+ Linux and Windows Images
- Outperforms AWS and Rackspace

Virtual Private Cloud (VPC)

- Encrypted, encapsulated, virtually private networks
- Full network access and control
- Load balancing-as-a-service
- VPC Included in VM pricing

Block Storage (Volumes)

- Lightning fast SSDs
- Instantly expandable
- \$0.25 per GB per month

Bulk Storage (Object Storage)

- Triple replication across the cluster
- Infinitely scalable
- Full service RESTful API
- \$0.075 per GB per month

USE CASES

Service Providers offering an IaaS compute platform or services higher up the stack

- Rapid resource deployment = faster service delivery
- Deliver full stack, Cloud infrastructure resources to your client base
- Quickly build out multi-tenant services to maximize profit margins

IT Departments acting as cloud service providers for business units and project teams

- Host business unit websites, test and dev environments or production web applications
- Departmental backup, disaster recovery and archival
- Enterprise Sync & Share solutions

Processing Big Data with tools like Hadoop

- Process in parallel for faster jobs
- Spin up workers for a job and spin them down after for cost savings
- Leverage Bulk Storage for a 3x redundant, scalable storage back end

Scaling Compute up and down to meet demand for web resources and applications

- Handle peaks and valleys with ease & pay for them only when they occur
- Leverage APIs and configuration management tools to auto scale your applications
